

Lombard Technology

A new one-stop sustainable technology funding solution

A collaboration with Rigby Capital (an award-winning part of the Rigby Group*) and their sister company SCC, the UK largest independently owned technology company^.

This collaboration will unlock the circular economy and provide you with access to true end-to-end technology services:

- From the initial funding and installation of state-of-the-art hardware and software.
- Managed services.
- Through to the refresh, recycling and re-use of assets.

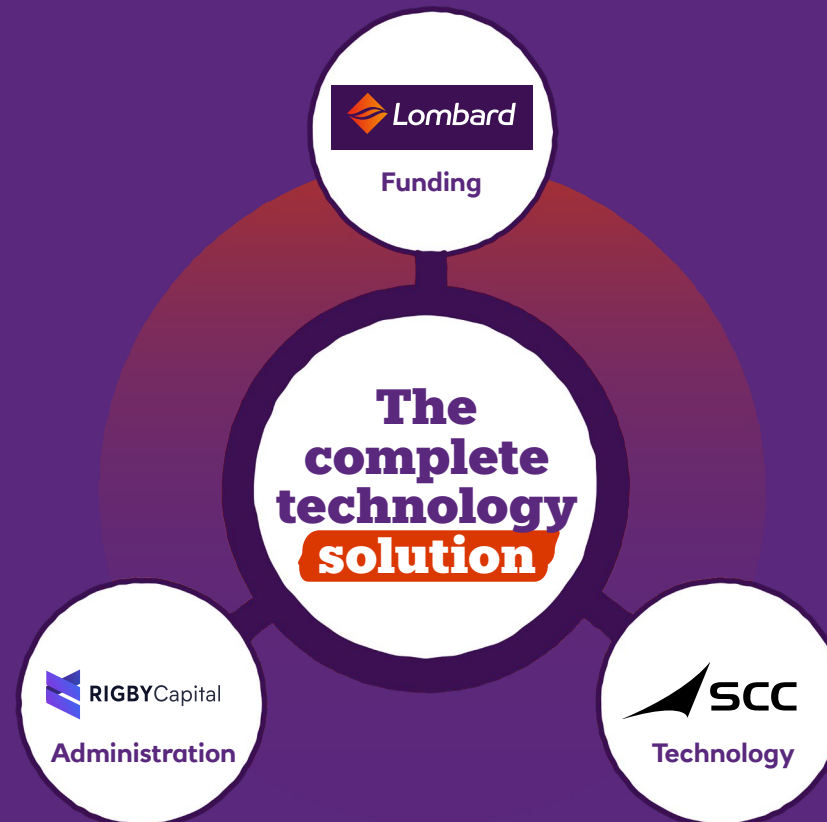

This market first 'as-a-Service' proposition is an 'everything under one roof' solution. It's vendor and technology-agnostic, with a guaranteed hardware resolution service, end-of-life collection plus optional workplace solutions.

Enables you to move to managed services with flexibility, simplicity and a single contract. Helping you manage your expenditure, reduce costs and increase operational efficiencies.

Funding & relationship management

Lombard leads the customer relationship, structures the transactions, and helps you to access the finance you need to secure the assets that will help you to thrive. Lombard provides the funding that underpins all the collaboration's transactions.

Seamless process

Rigby Capital delivers the in-life management, asset management and billing administration using specialist tools systems and processes designed 100% to work for IT funding.

as-a-Service

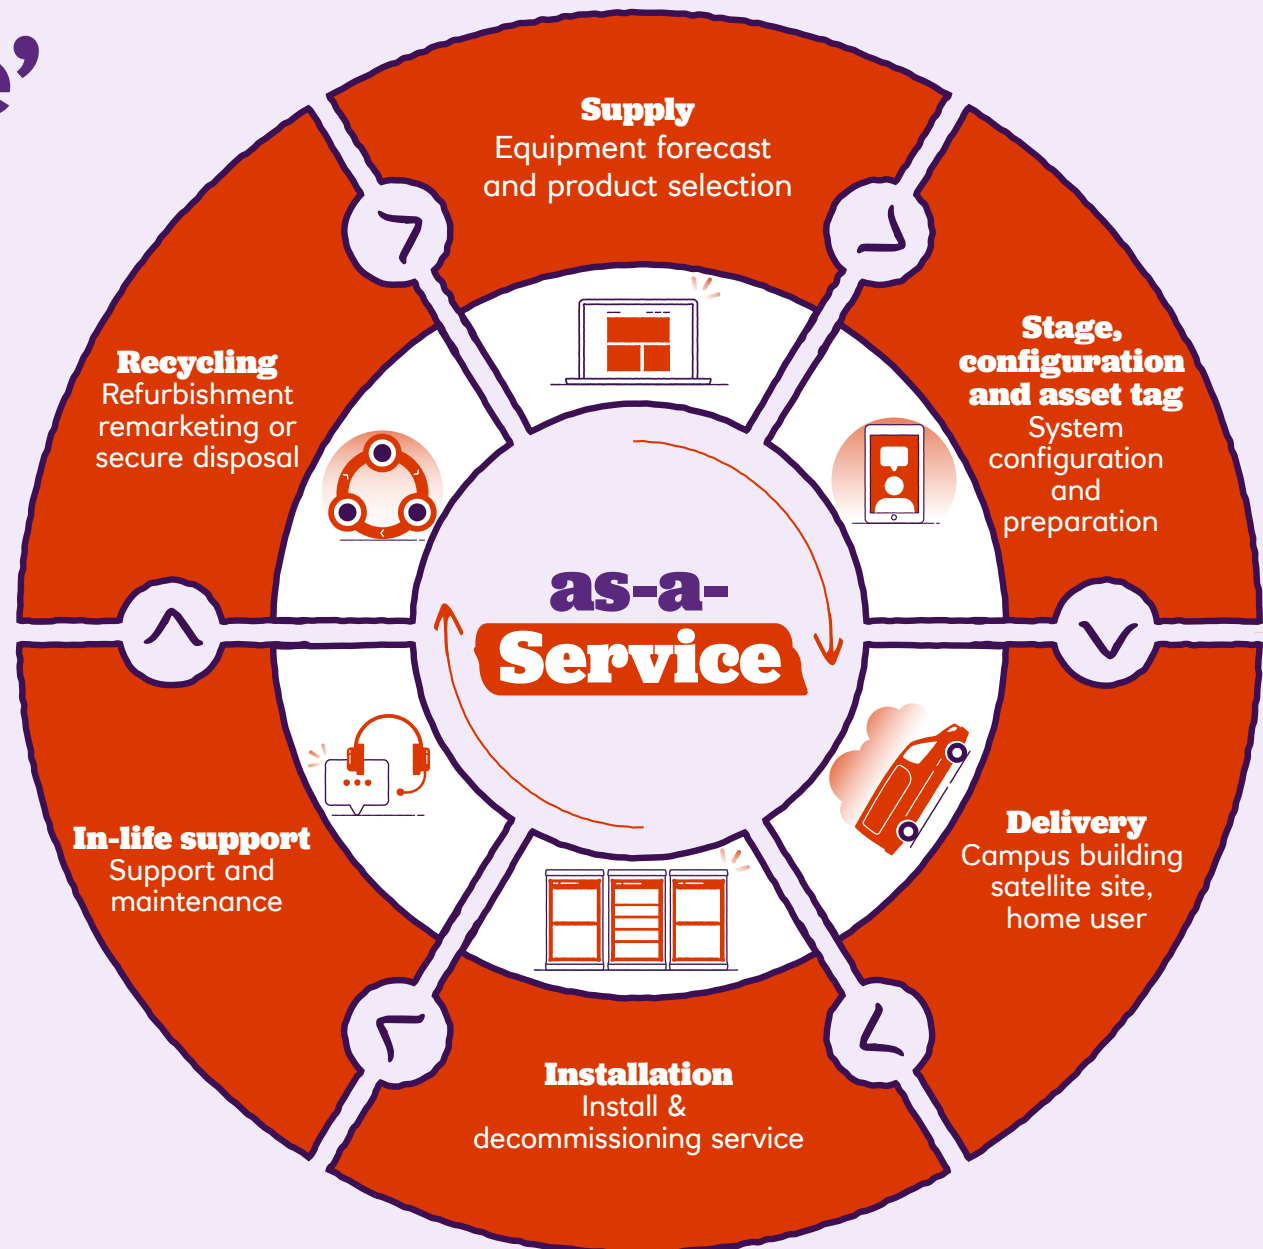

SCC's 'as-a-Service' solution provides a complete service package from device or technology supply and configuration through to management, decommissioning and refurbishment via an all-inclusive monthly amount.

The new 'as-a-Service' proposition

The new tech agnostic as-a-service proposition is an 'everything under one roof' solution.

- Choose only the services you need.
- Build your solution over time.
- OEM and tech-agnostic.
- Asset-level carbon tracking.
- Free up your internal resource to focus on strategic IT priorities.

Supporting a purpose-led agenda

The as-a-Service proposition provides ESG benefits

Access to the circular economy where devices are refurbished and resold, waste is minimised and materials are recycled.

Environmentally-friendly disposal of expired assets, ensuring that 0% of the parts in old devices end up in landfill sites.

Reduction in carbon footprint within a disciplined recycle programme, which could be evidenced down to an individual device.

Value release service we'll purchase existing tech assets you want to keep, releasing value back to you over their remaining useful life. For those you don't want to keep, we could help arrange the disposal even if they weren't originally financed with us.

TOMORROW BEGINS TODAY
